Introduction

The Ryan White HIV/AIDS Program (RWHAP) funds grants to states, cities, counties, and local community-based organizations to provide care and treatment services to people with HIV (PWH) to improve health outcomes and reduce HIV transmission among hard-to-reach populations. The New York City Department of Health and Mental Hygiene (NYC Health Department) is the Recipient of the RWHAP Part A grant. The HIV Care and Treatment Program (CTP) within the Bureau of Hepatitis, HIV, and Sexually Transmitted Infections (BHHS) is the designated Recipient in the New York Eligible Metropolitan Area (NY EMA) comprised of the five boroughs of NYC and the Lower Hudson Valley (Tri-County) region of Westchester, Rockland, and Putnam counties.

This directory is for service and health care providers seeking care, treatment, housing, and supportive services for PWH, as well as for PWH seeking services for themselves. The directory lists RWHAP Part A programs by service category, providing location of services by borough, agency name, contact information, and languages available at each agency.

To be eligible for RWHAP Part A funded services, clients must:

- Be HIV positive;
- Have a total household income at 500% of the federal poverty level (FPL)[1, 2], this is the same as the income eligibility guidelines for the New York State AIDS Drug Assistance Program (ADAP);
- Reside in the NY EMA (as defined above)

To make a referral, please contact the program directly using the information provided in the directory (please call the agency before visiting or directing clients to the program). If you have questions about the directory, please reach out to the NYC RWHAP Part A Program at rwta@health.nyc.gov.

Sincerely,

HIV Care and Treatment Program
Bureau of Hepatitis, HIV, and STIs
New York City Department of Health and Mental Hygiene

Services for PWH in New York City

Care Coordination Services

Care Coordination is a medical case management program that supports retention in care by offering PWH home- and field-based patient navigation services, coordinated medical and social services, counseling and coaching in adherence to treatment, directly observed therapy (DOT) for treatment, and health education to build the skills and knowledge needed to maintain stable health. Care coordination services are intended for those who have demonstrable challenges with engagement in care, retention in care and adherence to treatment, as well as the newly diagnosed or those with co-occurring conditions who may benefit from help coordinating care.

Harm Reduction Services

Harm Reduction services are outpatient counseling and supportive services provided to PWH who use or previously used alcohol or drugs and would like support in addressing their use. Harm Reduction services are provided by counselors who address a client's substance use concerns through a range of strategies, including individual and group counseling sessions and overdose prevention education, while also recognizing and meeting the various psychosocial needs of PWH. Services may include ear acupuncture for substance use. Harm Reduction programs who are funded by the RWHAP Part A program, also employ patient navigators to help clients access health and supportive services, maintain engagement in services, and support retention in care and adherence to treatment.

Mental Health Services

Mental health services provide outpatient psychological and psychiatric screening, diagnosis, treatment, and counseling services to PWH with a diagnosed mental health condition. Services are delivered following a detailed treatment plan by a licensed mental health professional (e.g. psychiatrists, psychologists, mental health practitioners, and licensed social workers). Mental Health Services providers who are funded by the RWHAP Part A program also employ patient navigators to help clients access health and supportive services, maintain engagement in services, and support retention in care and adherence to treatment.

Outpatient Ambulatory Services

Outpatient Ambulatory Services (OAS) provides services for people who are 50 years of age and older with HIV. The OAS program uses a multi-disciplinary care coordination model that integrates care across several medical practices including, but not limited to, cardiovascular, neurological, geriatric disciplines, and health education and counseling services. In addition to medical care, the program adapts evidence-informed strategies to meet the non-clinical needs of people who are 50 years of age and older with HIV by adding a component of social and physical group activities.

Psychosocial Support for Populations of Focus

Psychosocial Support Service programs provide an array of counseling services to help PWH cope with their diagnosis and psychosocial stressors. Providers have the flexibility to address barriers to care through a variety of strategies. Services include individual, group and family counseling, caregiver support, pastoral care, and health education. Counselors may also refer clients to other health and support services and engage community health workers to facilitate access to services.

Medical Case Management

Medical case management supports retention in care by offering PWH home- and field-based patient navigation services, coordinated medical and social services, counseling and coaching in adherence to treatment, directly observed therapy (DOT) for treatment, and health education to build the skills and knowledge needed to maintain stable health. The services are intended for those who have demonstrable challenges with engagement in care, retention in care and adherence to treatment, as well as the newly diagnosed or those with co-occurring conditions who may benefit from help coordinating care.

Mental Health Services

Mental health services provide psychiatric treatment and counseling services to those with a diagnosed mental illness. Services are delivered following a detailed treatment plan by a licensed mental health professional (e.g. psychiatrists, psychologists, and licensed clinical social workers) or authorized by New York State. Mental Health Services providers who are funded by the RWHAP Part A program also employ patient navigators to help clients access health and supportive services, maintain engagement in services and support retention in care and adherence to treatment.
